

## Chapter 2 - Rational Number Operations:

Adding integers:

$$\begin{array}{r} 3 + 4 \\ 7 \end{array}$$

$$\begin{array}{r} -8 + 3 \\ -5 \end{array}$$

$$\begin{array}{r} -8 + (-6) \\ -14 \end{array}$$

Rule or system to solve: owing a debt number line  
tokens

Subtracting integers:

$$\begin{array}{r} 3 - 4 \\ -1 \end{array}$$

$$\begin{array}{r} -8 - 3 \\ -11 \end{array}$$

$$\begin{array}{r} -8 - (-6) \\ -2 \end{array}$$

Rule or system to solve: \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

Do these rules change if we're using fractions or decimals? why or why not?
